2020 Change

SAMPLE AND METHODOLOGY DETAIL

Change Research National Post-Debate Poll: August 2-4, 2019

This online survey was conducted from August 2-4, 2019 nationwide.

Responses are reported for 1,450 self-reported Democratic primary voters with a margin of error of +/- 3.0 percentage points for the entire sample.

The survey was conducted online, using Change Research's Bias Correct Engine. Change Research collects survey responses through targeted online solicitations placed as advertisements on websites and social media platforms. The Bias Correct Engine establishes and continuously rebalances advertising targets across region, age, gender, race, and partisanship to dynamically deliver large samples that accurately reflect the demographics of a population. Post-stratification was performed on age, gender, ethnicity, and 2016 presidential vote.
